

AYE CHAN HSU

BUSINESS ANALYST

ABOUT ME

As a mid-level Business Analyst with a foundational degree in Computer Science, I specialize in bridging the gap between business stakeholders and technical engineering teams. Currently at Innovix Solutions, I leverage my technical background to deeply understand software capabilities, translate complex business requirements into clear technical specifications, and drive the successful delivery of scalable software products.

EXPERIENCE

Innovix Solutions

Mid-Level Business , MICT
Park, Yangon

2024 – Present

- Facilitated requirement-gathering sessions with key stakeholders to define project scope, business needs, and technical constraints.
- Translated complex business requirements into clear, actionable user stories, use cases, and technical specifications for the engineering team.
- Collaborated closely with software developers and QA testers throughout the Software Development Life Cycle (SDLC) to ensure deliverables met quality benchmarks.
- Analyzed existing business processes and system workflows to identify bottlenecks and recommend data-driven software improvements.
